# Command Reference: WriteOperationalRightsToStateMod()

Write operational rights data to a StateMod file

## StateMod Command

Version 3.12.00, 2010-12-14

The WriteOperationalRightsToStateMod() command writes operational rights that have been defined to a StateMod operational rights file. The following dialog is used to edit the command and illustrates the syntax of the command.

**Edit WritePlanStationsToStateMod() Command**

This command writes plan stations data to a StateMod plan stations file.  
It is recommended that the file be specified using a path relative to the working directory.  
The working directory is: C:\Develop\StateDMI\_SourceBuild\StateDMI\test\regression\commands\WritePlanStationsToStateMod  
The default value for "Write how" is OverwriteFile, which will create a new file, overwriting an old file if it exists.

StateMod file:

Write how:  Optional - indicate whether to overwrite/update (default=OverwriteFile).

Command:

WriteOperationalRightsToStateMod

## WriteOperationalRightsToStateMod() Command Editor

The command syntax is as follows:

```
WriteOperationalRightsToStateMod (Parameter=Value, ...)
```

#### Command Parameters

Parameter	Description	Default
OutputFile	The name of the output file to write, surrounded by double quotes.	None – must be specified.
WriteHow	OverwriteFile if the file should be overwritten or UpdateFile if the file should be updated, resulting in the previous header being carried forward.	OverwriteFile
