
Command Reference: setCULocationDelayTableAssignmentsFrom StateMod()

Set CU Location delay table assignments from data in a StateMod file

StateCU Command

Version 01.07.00, 2004-03-31, Color, Acrobat Distiller

The setCULocationDelayTableAssignmentsFromStateMod() command reads delay table assignment data from a StateMod diversion or well stations file and transfers the data to a CU Location. The following dialog is used to edit the command and illustrates the syntax of the command.

setCULocationDelayTableAssignmentsFromStateMod

setCULocationDelayTableAssignmentsFromStateMod() Command Editor

The command syntax is as follows:

```
setCULocationDelayTableAssignmentsFromStateMod(param=value,...)
```
