
Command Reference: WriteControlToStateMod()

Write control data to a StateMod file

StateMod Command

Version 3.12.00, 2011-01-17

The `WriteControlToStateMod()` command writes the control data to a StateMod control file. The following dialog is used to edit the command and illustrates the syntax of the command.

Edit WriteControlToStateMod() Command

This command writes data set controlling information to a StateMod control file.
It is recommended that the file be specified using a path relative to the working directory.
The working directory is: C:\Develop\StateDMI_SourceBuild\StateDMI\test\regression\commands\ReadControlFromStateMod
The default value for "Write how" is OverwriteFile, which will create a new file, overwriting an old file if it exists.

StateMod file:

Write how: Optional (default=OverwriteFile).

Command:

WriteResponseToStateMod

WriteControlToStateMod() Command Editor

The command syntax is as follows:

```
WriteControlToStateMod (Parameter=Value, ...)
```

Command Parameters

Parameter	Description	Default
OutputFile	The name of the output file to write, surrounded by double quotes.	None – must be specified.
WriteHow	OverwriteFile if the file should be overwritten or UpdateFile if the file should be updated, resulting in the previous header being carried forward.	OverwriteFile
